

SA14S

Ideal All-Purpose 14" Semi-Rugged Laptop PC

- Product: SA14S
- Application: Field Service

Workers of Field Service industry in a Southern Europe country needed a high-performance laptop that can support computation/communication /data transmission and have multiple IOs for legacy peripherals. The laptop must do so reliably under any unfriendly condition in the outdoor environment. They chose Durabook SA14S.

“After considering all the needs, we adopted SA14S. Now we can bring the device to sites to carry out maintenance or repair work. Being always connected, we can access or transmit critical data to back office and achieve greater efficiency through the business process.” Said the field service engineer. “And it helps that it always works.”

SA14S is built with latest Kabylake CPU from Intel. It is IP53 and MIL-STD 810G certified and built with high quality of magnesium alloy. It prevents drop, vibration and accidental spill.

DURABOOK has been working for Field Servicer engineers all over the world for years. By using DURABOOK products, tough jobs become easier. That’s why Field Service invests in IT equipment. That’s why they choose DURABOOK.

DURABOOK. Anytime Mission Calls.
